

ABSTRACT

**METHOD FOR LOADING A MEDICAMENT DISPENSER
WITH A MEDICAMENT CARRIER**

Abstract

There is provided a method of loading a housing for a medicament dispenser with a medicament carrier. The carrier has the form of an elongate strip and has multiple distinct medicament doses carried thereby. The carrier is particularly in the form of a peelable blister strip. In one aspect, the method comprises the steps of loading the housing with at least one leader in the form of an elongate strip such that a leading end of said at least one leader is drivably anchored within the housing and a trailing end of the at least one leader protrudes from the housing; fixing a first end of the medicament carrier to the trailing end of the at least one leader; and drivably moving the leading end of the leader such that the medicament carrier is moved into the housing.
